WORK HISTORY

FULL STACK SOFTWARE ENGINEER

Embrace Home Loans

July 2024 - Present

- Led development of a mission-critical pricing engine integration, designing and implementing backend services, APIs, webhook ingestion, and frontend components to ensure uninterrupted loan pricing operations
- Served as primary engineer and technical owner for multiple high-priority initiatives during a period of reduced team capacity, delivering projects essential to business continuity
- Designed and implemented compliance-driven features supporting regulated financial workflows (e.g., VA loan processing)
- Acted as de facto technical lead, partnering with business stakeholders to define requirements and deliver solutions under aggressive timelines
- Built scalable data ingestion pipelines integrating external systems via APIs and asynchronous webhooks
- Recognized with a company-wide excellence award, nominated by multiple managers for technical leadership, execution speed, attention to detail, and successful delivery of business-critical projects

FULL STACK SOFTWARE ENGINEER

Tulip Retail

February 2022 - February 2024

- Built and scaled full-stack features for an iOS PoS platform supporting thousands of daily transactions with 0% downtime using PHP, Golang, JavaScript, ReactJS, Docker, Kubernetes, and GCP
 - Efforts generated at least 12 new features per quarter including rigorous testing & monitoring of feature usage post-deployment
- Increased in-store transactions by 10% through development of core commerce functionality (exchanges, cart, checkout, promotions, payments)
- Collaborated across teams and with stakeholders regarding the requirements, development, and monitoring of key PoS features involving cart & order functionality, receipts, exchanges, taxes, discounts/promotions, gift cards, coupons, and more
- Refactored legacy receipt generation system, improving performance by 30% and reducing development time by 50%
- Drove the implementation of cross-team features, including designing, planning, and refactoring three of Tulip's services to create one seamless appointments-to-PoS-to-inventory management system for 3 clients to utilize with their unique internal systems
- Mentored junior engineers and contributed to code reviews, improving team velocity and code quality
- Recognized with 2 internal awards for attention to detail, cross-team collaboration, and successful delivery of high-impact projects

SOFTWARE ENGINEER IN TEST (CONTRACT)

Ocean State Job Lot

June 2021 - December 2021

- Developed automated test frameworks using Java and Selenium for a large-scale e-commerce platform
- Contributed to launch of Buy Online Ship to Store, supporting a release that generated \$11M in increased revenue

SOFTWARE QA ENGINEER (CONTRACT)

UserTesting Platform

SOFTWARE ENGINEER

Massive Hawk Games

TEST AUTOMATION ENGINEERING INTERN

Cegment Inc.

May 2021 - August 2021

January 2015 - January 2016

July 2012 - September 2012

PROJECTS

INDEPENDENT DEVELOPMENT prev. known as OctoSloths Productions

- Deployed two full-stack mobile applications to Google Play Store using C# and Unity5, featuring leaderboards and seamless online competition.
- Designed and implemented over seven full-stack web applications using React, NodeJS, Express, Spring Boot, MongoDB, Bootstrap, and more utilizing RESTful APIs

EDUCATION

Bachelor of Science in Computer Science - Southern New Hampshire University 2021

Graduated with highest honor: *summa cum laude*

Graduated with a GPA of 3.9 out of 4.0

SKILLS
